

50mm stainless steel

50mm diameter stainless steel pole

Make a big impression. Perfect for contemporary interiors with very tall windows or large expanses of glass.

One bracket is recommended for every 240cm of pole depending on the weight of your curtains.

Use either our ring brackets or our extendable standard bracket (we will need to drill and tap the pole in this instance, so we would need to know the exact placement of your brackets).

Extra support arms and extension arms are also available. Poles are joined using the ring bracket, as a pole connector is not supplied.

See page 57 for more bracketry details. All 50mm finials can be used on this pole except for the flush disc finial

Rings

Standard and passing rings are available with a flat section profile. Allow at least one ring for every 10cm of pole length.

All rings have a nylon insert to ensure curtains glide smoothly and quietly along the pole.

Passing rings allow one pair of curtains or even a single curtain to be pulled all the way across the window.

pole length	stainless steel
150cm 	P-50-150-SS
180cm 	P-50-180-SS
240cm 	P-50-240-SS
300cm 	P-50-300-SS
360cm (2pc) 	P-50-360-SS
480cm (2pc) 	P-50-480-SS

ring type	stainless steel
flat section ring	R-FSRI-50-SS
passing ring	R-PAS-50-SV
